As new reporting from Stocktwits and other sources becomes available, the probability weights assigned to different scenarios should be updated accordingly.

Placing our stock price in the context of India's Financial Research environment adds an important dimension to the analysis. Regional factors — including economic conditions, policy settings, and institutional characteristics — shape both the information environment and the market mechanisms through which developments affecting our stock price are priced. Investors who account for these contextual factors will develop more nuanced and ultimately more useful analytical conclusions about dividends, buybacks, and capital allocation.
